Software Engineering Student
University of Calgary

To: Electronic Arts

Dear Recruiter,

I'm writing to you to express my interest in the Software Engineer Co-op (FC) position with Electronic Arts. I learned about your company through the countless video games your company has developed in the past decade, but mainly the FIFA games.

Currently I'm a third year student at the University of Calgary working to become a Software Engineer major. My expected graduation is December 2026. I'm eager to improve my coding abilities by helping to develop a new EA FC game. I have grown up playing your FIFA/FC titles ever since I could hold a controller and cherish the memories that came with it to this day. I believe your company values this passion for your work and these characteristics in a worker. Having the privilege of serving as a co-op student would mutually bring value to your company and my growth as an individual looking to strengthen their skills. This opportunity would fulfill my dream of working for a company which produces the games I grew up playing as well as grow my interest and passion for the work put into the final release of the product. After graduation I hope to work for a company like EA to create meaningful games and enhance existing projects to influence people's lives the way it has influenced mine. With this opportunity I believe I can achieve this goal in the near future.

During my studies at the University of Calgary and Universidad Carlos III Madrid, I have had the opportunity to learn about coding in C++ and a variety of other languages, focusing on modular, object-oriented programming to ensure quality in applications. Alongside these skills, I have also developed my mathematical skills to a high level, mainly focusing on linear algebra and trigonometry to accurately calculate the positions of objects in a running program. My first project after learning the ability to code was the recreated Flappy-Bird game mentioned in my resume as my passion for video games sparked the desire to create some myself. I believe this knowledge and passion could be of interest to you as you are looking to grow your team with motivated workers.

I would like the opportunity to meet with you to discuss this role. Please let me know if you have any questions. You can reach me by phone at 825-454-8636 or email at gerardo.gdl04@gmail.com. Thank you for your consideration.

Sincerely,
Gerardo Garcia de Leon
